In the **Basic Search**, located under **Full-Text Search**, you can search by *Title, Author, Abstract, Title or Abstract*, and/or *Anywhere in Article*.

The search engine uses a **default AND** between search terms.

Olivet has an **online subscription** to the ACS journals. You may use the (advanced) Search and view articles online (in HTML and .pdf).

.html versions of the articles will print faster. But, **.pdf** versions will look exactly like the print edition or the journal (with the same page numbering and placement of figures).

You can select the publication **Timeframe** for your search: *ASAP* (As-Soon-As-Publishable, not-yet-published articles), *Current Issue – 1996* (Published articles dating from 1996 to the most current issue), *Legacy Archives 1879 – 1995* (Articles published between the years 1879 and 1995), or *All*.

Under **Date Range**, you can also search for articles published within a certain range of time.
