

Education Research Literature

Finding Educational Theorists- Specific Research Literature:

Scholarly databases are the most efficient place to begin research. Subject specific databases include reports of research in a specific field. For Education, the Education Research Complete database is a great place to start.

Navigation:

Step 1: Begin by going to library.olivet.edu

Step 2: From the Library Home page, select "Subject Guides." Under the "Most Frequently Used Guides" list, select "Education: Professional."

Step 3: Select Education Research Complete.

Step 4: Select an appropriate article type. Carefully read the abstract.

Abstract Overview:

After getting article results, select an appropriate title. After the article results screen opens, scroll down to access the abstract. Read it carefully, for some Abstracts only mention other studies that conducted the real research.

Abstract:

This book contains selected refereed papers from the 21st Annual Conference of the Australasian Science Education **Research** Association. The papers are as follows: "A Learning Model for Science Education: Developing Teaching Strategies" (Appleton); "Researching Balance between Cognition and Affect in Science Teaching" (Baird et al.); "Toward a Gender-sensitive Model of Science Teacher Education for Women Primary and Early Childhood Teachers" (Bearlin); "Learning in Science Project (Teacher Development): The Framework" (Bell, Kirkwood, & Pearson); "The Pupil as Philosopher" (Carr & Kirkwood); "New Data and Prior Belief: The Two Faces of Scientific Reasoning" (Dawson & Rowell); "The Influence of Gender, Ethnicity and Rurality Upon Perceptions of Science" (Dunne & Rennie); "Rediscovering Ignorance" (Edwards); "Practicalizing **Piaget** at the ASEP Guidelines Conference 1970" (Fawns); "The Quality of Teacher Education Programs" (Fensham & West); "Learning Environment, Learning Styles and Conceptual Understanding"

A Well-Written Abstract will include:

1. The research done
2. The population group
3. The methods used
4. Any data collection and analysis

Notice: *If the article is a primary research report, the author will be describing their own research purpose, methodology, and results.*
