

# Finding Trade Publications

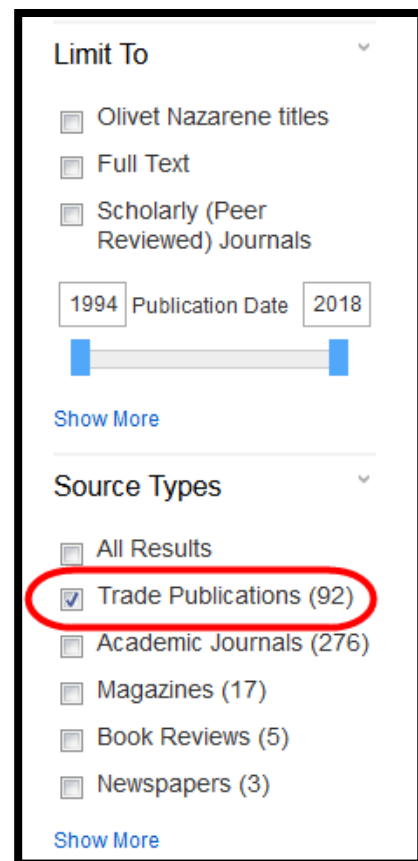

Start at the Library homepage, <https://library.olivet.edu/index.php>  
Then click on the “Subject Guides” tab

1. From the News or Nursing Subject Guides, connect to the library database Academic Search Complete
2. Do a keyword search for your topic, such as **nurses**

The screenshot shows the EBSCOhost search interface. At the top left is the EBSCOhost logo. The search bar contains the text "nurse or nurses or nursing". To the right of the search bar are three dropdown menus labeled "Select a Field (optional)". A green "Search" button is on the far right. Below the search bar are three rows, each starting with an "AND" dropdown menu followed by an empty search box. To the right of these rows are "Create Alert" and "Clear ?" buttons. At the bottom right are plus and minus icons.

3. Narrow your results to “Trade Publications” using the options on the left side of the screen. Trade publications (Journals/Magazines) are written for *practitioners* in the field. They are NOT research-based, but can help you stay relevant with trends, conferences, and concern in your field.

The screenshot shows the "Limit To" sidebar. It has a dropdown arrow at the top right. Under "Limit To", there are three checkboxes: "Olivet Nazarene titles", "Full Text", and "Scholarly (Peer Reviewed) Journals". Below these is a "Publication Date" range from 1994 to 2018 with a slider. A "Show More" link is below the date range. Under "Source Types", there are several checkboxes: "All Results", "Trade Publications (92)", "Academic Journals (276)", "Magazines (17)", "Book Reviews (5)", and "Newspapers (3)". The "Trade Publications (92)" checkbox is circled in red. A "Show More" link is at the bottom.
